Chuma Okoro

Education

Dec 2024 **Baruch College - Zicklin School of Business**, *M.B.A*, GPA: 3.66

May 2019 **Brooklyn College**, *B.S., Computer Science*, GPA: 3.53

2018 – 2019 **CUNY Tech Prep**, *Technical & professional development program*, ReactJS, NodeJS, MySQL

Skills

AI Tools: Claude Code, OpenAI API/GPT, LLM-assisted development, prompt engineering

Languages: Python, Java, PHP, Lua, Ruby, SQL, C++, HTML/CSS, JavaScript, Kotlin, Typescript

Technical Skills: System Design, AWS SDK, Spring Boot, React, Git, RESTful API dev, Jenkins, Grafana, GCP SDK, Log4j, JPA/JDBC, PostgreSQL, Cassandra, GraphQL, Comdb2, Memcached

Leadership Skills: Written and Verbal Communication, Engineering Mentorship, Recruiting, Requirements Gathering, Project Planning

Professional Experience

Jan 2023 – Present **Bloomberg**, *Senior Software Engineer*, Bloomberg Indices, Bond Data Platform

- Built out acquisition and calculation pipelines for FX rates, Treasury STRIPS, and GDP & Fiscal Strength data covering 214 countries, now powering Bloomberg's Fixed Income Indices.
- Led creation of the European ABS Indices and securitized products expansion, migrating 47 bond fields from legacy C# to a Lua/Python/C++ platform across 8 teams.
- Optimized Postgres copydown workflow (batching, parallelism, memory-bound steps), cutting runtime from **19 to 7 hours**.
- Built an async data acquisition framework for high-throughput, low-latency ingestion; applied it to FX rates backfill, loans backfill, and new index onboarding.
- Led Bloomberg Indices' first NY org Tech Week, building Release Manager, a tool that determines release candidates via git commit hash analysis.
- Official engineering mentor and Engineering Recruiting Captain; authored 20+ technical docs used by 16+ engineers and 4+ managers.

Jan 2022 – Jan 2023 **Amazon**, *Software Development Engineer II*, Amazon Ads, Shopper Panel App

- Designed and built 4+ scalable systems leveraging event streaming, trigger automation, and time-based automation; built secure cloud infrastructure (AWS CDK + PrivateLink) across 9 AWS accounts to isolate backend systems from mobile app layers.
- Productionized computer vision algorithms (OpenCV) for receipt validation, including blur detection and annotated feedback.

May 2019 – Jan 2022 **Etsy**, *Software Engineer II & I*, Buy on Etsy App, Updates

- Interviewed, onboarded, and mentored 3 engineers to accelerate team productivity.
- Designed and built several Server Driven UI features (10+ delivered) and led an AI/embeddings-based reranking initiative for in-app updates (iOS/Android/web), increasing GMS and revisit rate.

iOS & Side Projects

2026 – Present **Tempo64 (iOS App)**, *App Store, tempo64.com*

Chess app built with open-source tools that turns chess games into shareable cinematic videos, with an EC2-hosted backend and DynamoDB-powered puzzle engine; organic marketing drove over 120K views across social media.

2024 – Present **ScalePal (iOS App)**, *App Store, chumomega.github.io/ScalePalWeb*

Weight-tracking app with HealthKit integration, CloudKit sync, streak tracking, and WidgetKit home-screen widgets.

2024 – Present **Echo Chamber (iOS App & Chrome Extension)**, *getechochamber.com*

AI-powered tool detecting ideological clustering; Firebase Auth/Firestore, Stripe Billing, and a FastAPI/NLP backend.

2022 – Present **PodRank (Web & iOS App)**, *podrank.co*

Embeddings-based podcast recommendation engine; Spring Boot, Postgres, vector search, and full observability.

Extracurriculars

Jan 2024 **Florence & Robert A. Rosen Family Foundation Case Competition**, *1st Place*

Developed and presented a technical strategy for improving emergency management systems for condos and co-ops.
